

## **Withings Announces US Availability of Its Highly Anticipated ScanWatch Horizon - the Health Hybrid SmartWatch Inspired by the Luxury Diver Watch Tradition**

*Withings' most medically advanced wearable gets diver style design with rotating bezel, luminescent indexes, and upgraded water resistance to 10 ATM*

**Issy-les-Moulineaux, France – May 17, 2022,** Today, [Withings](https://www.withings.com), pioneers of the connected health revolution, has announced the US availability of its highly anticipated [ScanWatch Horizon](#). Available from [Withings.com](https://www.withings.com), [Amazon](#), and [Best Buy stores](#), it is the first hybrid smartwatch inspired by the luxury diver watch tradition to deliver state-of-the-art health technology. Priced \$499, it can take an ECG and monitor heart rate, breathing disturbances, blood oxygen levels, sleep, and physical activity, even underwater!

The health and wellness features of this ground-breaking device are encased in a luxurious design that features sapphire-glass casing with anti-reflection coating and a stunning finish. It boasts a stainless-steel rotating bezel with laser engraved markings that incorporate the standard codes of diving practice, alongside Luminova hollow watch hands, indicators, and thick indices that allow it to be used in low light, all of which add to its high-end design.

For the classic diver watch look, ScanWatch Horizon comes with a stainless-steel band as well as a more elasticated, rubberised wristband for sports usage. In addition, it has an impressive 30-day battery life and 10 ATM water resistance, making it the perfect accessory for swimming, snorkelling, and water sports. All of which can be monitored using its sport tech features and the connected Health Mate app. You can even take an ECG while under water!

Horizon is the latest hybrid smartwatch in the Withings ScanWatch range, which also includes the original and Rose Gold versions. Each version has health, wellness, and fitness capabilities, that were developed by experts and validated in multiple clinical trials. Features of the ScanWatch Horizon include:

- Clinically validated detection of atrial fibrillation by ECG
- Heart Rate scan every 10 minutes using a PPG sensor
- Clinically validated SpO2
