Your Privacy when Using Nokia Health Products and Services

[Nokia's Privacy Statement](#) explains how we process your Personal data when you use our Products and Services. In addition, the following applies to your use of Nokia Health Products and Services ("**Product(s) and Service(s)**")

These Products and Services are composed of various software applications (including mobile applications, web Applications, Product software), cloud-based Services and "smart" Products that gather, store and process data to provide you insights and Services to help you lead a healthier life.

What Information Do We collect?

When you are using Nokia Health Products and Services, we may need to collect data to provide you the Service as described in the Nokia's Privacy Statement. As transparency and easy access are key factors for us, we have created this list of pictograms so that you can easily identify what Personal data is processed in the following scenarios.

- **Identity data** means the data which can directly identify you. They include, among others, your email address, birth date, name, surname, phone number, delivery address, IP address, videos and pictures of you.
- **Activity data** means data which correspond to a measurement of your physical/sports activities. They include, among others and depending on your Product, your number of steps, distance travelled, number of swimming strokes, number of calories burned, type of activity, level of activity, sport session time.
- **Body metrics data** means data which correspond to measurement of your physical features and your body activity. They include, among others and depending on your Product, your weight, height, muscle, body fat, heart rate, breathing rate, blood pressure, temperature.
- **Environmental data** means data which correspond to your environment or surroundings. They include, among others and depending on your Product, noise level, light level, temperature level, CO2 concentration.
